DETAILED ACTION

Response to BPAI Decision

1. The examiner was **AFFIRMED** in the decision of the Board of Patent Appeals and Interferences mailed 6/19/2008.

Continued Examination Under 37 CFR 1.114

2. A request for continued examination under 37 CFR 1.114, including the fee set forth in 37 CFR 1.17(e), was filed in this application after final rejection. Since this application is eligible for continued examination under 37 CFR 1.114, and the fee set forth in 37 CFR 1.17(e) has been timely paid, the finality of the previous Office action has been withdrawn pursuant to 37 CFR 1.114. Applicant's submission filed on 8/19/2008 has been entered.

Claim Rejections - 35 USC § 112

3. The following is a quotation of the first paragraph of 35 U.S.C. 112:

The specification shall contain a written description of the invention, and of the manner and process of making and using it, in such full, clear, concise, and exact terms as to enable any person skilled in the art to which it pertains, or with which it is most nearly connected, to make and use the same and shall set forth the best mode contemplated by the inventor of carrying out his invention.

4. Claims 1, 2, 4-8, 11-16, 18-23, 26, 27 and 30-33 are rejected under 35 U.S.C. 112, first paragraph, as failing to comply with the written description requirement. The claims contain subject matter which was not described in the specification in such a way as to reasonably convey to one skilled in the relevant art that the inventors, at the time the application was filed, had possession of the claimed invention.

The specification does not teach or suggest the newly added zinc oxide layer thickness range of “about 40-150nm” or the newly added NiCr oxide (or oxide of Ni and/or Cr) layer thickness range of “about 20-45nm.” Rather, the specification appears to mention a zinc oxide layer thickness range of 40-150 Å and a NiCr oxide layer thickness range of 20-45 Å (see [0034]).

5. The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

6. Claims 1, 2, 4-8, 11-16, 18-23, 26, 27 and 30-33 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

The word “about” renders the claims indefinite because there is close prior art and there is nothing in the specification, prosecution history, or the prior art to provide any indication as to what range is covered by the term “about.”

Response to Arguments

7. Applicant's arguments filed 8/19/2008 have been considered but are moot in view of the new grounds of rejection.
